Need and Use of Information Collection: Initially this collection was part of a clearance request for the application forms for two programs, and due to protracted delays in the readiness of one of the programs it became necessary to create a stand-alone request for this program. This request is for the Application Form for this international training program. The program will recruit post-doctoral researchers into a new fellowship research training program for HIV and drug use. The program will train new

researchers in research to advance the science of HIV and drug use and foster multinational research in this disease area. The program is open to all foreign nationals. The Application Form will collect necessary information for determining the most meritorious applicants. NIDA is requesting approval from OMB for this application form to be used by the Institute's fellowship program to train new researchers and fund experienced scientists, of other nations, in research to advance the science of HIV and drug use while fostering multinational research in this disease area. The application form will be web-based.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total annual estimated burden hours are 83.
